Definitions and assumptions

- **Occupancy = census days / licensed bed days.**
- **ALOS = census days / discharges (acute-care view excludes psychiatric, long-term care and developmental facilities).**
- **LWBS = patients who left without being seen / ED visits.**
- **High-Acuity % = severe and critical EMS visits / all classified visits (admitted and not admitted).**
- **Pressure Index = weighted occupancy (capped at 100%), diversion hours and LWBS rate, scaled to the highest hospital in the selection. Weights are analyst assumptions, not a clinical standard.**
- **Blank monthly diversion values are treated as zero hours.**
- **One reporting year only: no year-over-year comparison.**
- **Equipment above $500K and projects above $1M only.**
- **IC columns are labelled as in the source; their meaning is unconfirmed.**

Data coverage

- **326 hospitals report ED traffic; the rest have no ED data.**
- **155 hospitals reported no service availability (shown as Not Reported, never as No).**
- **106 hospitals report equipment and 138 report projects.**
- **27 hospitals have an ALOS above 60 days (state psychiatric, long-term care, developmental).**
- **6 hospitals have a license status other than Open.**
- **Hospitals above 100% occupancy are kept and flagged.**
